

Connor Murphy

Computer Science, B.S. — University of New Hampshire

Vero Beach, FL · (603) 362-2061 · cmurphy1140@gmail.com · linkedin.com/in/cam1140

An educated young man who has shown up for his family, employers, friends, and himself every single day. Learned to build software the hard way, before AI could write it, and now ships backend pipelines, databases, and iOS apps with the same habit: understand the problem, read every line, verify the result. Steady under pressure, plain-spoken, and quick to earn the trust of the people he works with.

PROJECTS

Cyber-Physical System Assurance — Home Automation Field Study

2026 – Present
Swift, OpenAPI, WebSockets

- Reverse-engineered a professionally installed home automation system’s local interfaces, mapping 150 lighting loads, 457 API operations, and 1,502 real-time state channels.
- Built Swift instrumentation and a 182-test safety suite; normalized 1,257 apparent state differences into seven genuine changes and documented an unauthenticated local control surface without publishing household identifiers.

Wireless Inexpensive Bathymetry Logger (WIBL), Senior Capstone

2021 – 2022
AWS Lambda, Step Functions, Serverless

- Redesigned AWS bathymetry processing with Lambda, Step Functions, S3, and the Serverless Framework, enabling modular functions and configurable routing. Developed decoding, timestamping, deduplication, outlier processing, format translation, and database-upload stages. Deployed and tested the end-to-end workflow to verify routing and downstream data transformation.

EXPERIENCE

Golf Course Operations

Apr 2026 – Present
Vero Beach, FL

Sandridge Golf Club, Indian River County

- Run daily operations at a county-owned 36-hole facility: tee-time scheduling and zero-variance cash reconciliation.
- Coordinate pro shop, maintenance, and county administration under government records procedures to keep play on schedule.

Server, Bartender, and Catering Orchestrator

Nov 2025 – Apr 2026
Vero Beach, FL

Post & Vine

- Excelled in a high-volume, fast-paced environment through detail oriented personalized customer service.
- Developed strong client-facing skills by building loyal customer relationships through authentic communication and anticipating guest needs.

Lead Substitute Teacher — Physical Education & Health

Sep 2024 – Oct 2025
Salem, NH

Birches Academy of Academics and Arts

- Independently planned and delivered K-8 PE and health lessons, adapting to student needs and changing schedules.
- Communicated student progress to parents and administrators in plain language; grateful to be a role model for our youth.

Telematics Backend Development Intern

May 2022 – Aug 2022
Remote

Liberty Mutual · Offered a full-time TechStart software engineer position at the end of the internship

- Developed Java backend components running on AWS Lambda to parse and transform vehicle telematics data for an auto-quote eligibility and scoring pipeline, contributing to process improvements credited with a 30% reduction in operating costs.
- Built unit and integration tests for serverless data-processing services, validating data transformations and downstream interactions and resolving defects through peer code review.
- Documented service behavior, implementation details, and handoff procedures adopted by the full-time engineering team while collaborating through daily standups, sprint reviews, and demos.

SKILLS

SYSTEMS AND APIS Swift · Java · Python · SQL · Git

REST/OpenAPI, WebSockets, JSON, AWS Lambda, real-time state synchronization

SECURITY AND NETWORKING Network and interface analysis

Service discovery, protocol investigation, allow-listing, least-privilege boundaries, privacy-conscious documentation

TESTING AND RELIABILITY Evidence before confidence

Unit and integration tests, mock adapters, malformed-input handling, concurrency, reconnect recovery, physical-outcome verification

TECHNICAL COMMUNICATION Complex systems made inspectable

System diagrams, measured-versus-inferred language, correction records, tradeoff explanations, verified AI-assisted development

EDUCATION

University of New Hampshire

May 2023
Durham, NH

Bachelor of Science in Computer Science
